Osamu Jinguji

March 12, 2014 [Photography](#)

Japanese photographer born in 1962, [Osamu Jinguji](#) does not just grasp the real to back it with some aesthetics. His process goes beyond and aims to capture the immanent soul of any entity. Through his lens, stone gets animated and material comes to life. Indeed playing with light, perspectives, blurrinesses, framings, he manages to instill some mystery into his pictures so that a monument, a front store or a silhouette printed on glossy paper reaches a kind of presence and fascinates those who look at it. An approach as subtle as impressive that transcends time and space until fixing the sur-real and setting into form the expression of a powerful mystic.
